OMB NO. 0579-0036

ANNUAL REPORT OF RESEARCH FACILITY
(TYPE OR PRINT)

Naval Dental Research Institute
Naval Dental Research Institut
310a B Street, Building 1-H
Great Lakes, IL 60088

Telephone: (847) -688-4651

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, or experimentation, or held for these purposes. Attach additional sheets if necessary)

Vivarium, Bldg. 43-H

FACILITY LOCATIONS (Sites) - See Attached Listing

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animal being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals an for which appropriate anesthetic, analgesic, or tranquillizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for wh the use of appropriate anesthetic, analgesic, or tranquiliz drugs would have adversely affected the procedures, res or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reas such drugs were not used must be attached to this report	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits	2				
9. Non-human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					
Mice	9		8		8
Rats	45		63		63

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, or experimentation, or held for these purposes. Attach additional sheets if necessary)

FACILITY LOCATIONS (Sites) - See Attached Listing

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals an for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for wh the use of appropriate anesthetic, analgesic, or tranquiliz drugs would have adversely affected the procedures. results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals a the reasons such drugs were not used must be attached this report).	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs			53		53
5. Cats					
6. Guinea Pigs		2626			2626
7. Hamsters					
8. Rabbits		3273			3273
9. Non-human Primates					
10. Sheep					
11. Pigs			20		20
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual rese teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and ap Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary inx brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

APHIS Form 7023 Column E Explanation

This form is intended as an aid to completing the APHIS Form 7023 Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 33-R-0024

2/3. Species (common name) & Number of animals used in this study:

Rabbits (9)

4. Explain the procedure producing pain and/or distress.

1) 4 Rabbits - Production of polyclonal antisera using one administration of complete Freund's adjuvant can produce pain and distress. Any use of complete Freund's must be categorized by IACUC SOPs as a category "E". The IACUC SOP prohibits multiple Freund's adjuvant injections.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

1) Injections occur under anesthetic. It is possible that pain/distress can last for 24-48 hours. NZW rabbits are the best source of antibody production, and are monitored daily for signs of distress. Animals will be treated if pain or distress persists. Category "E" is assigned not because pain relief is withheld, but because of the use of Freund's.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

QCN

signs of ataxia and seizure activity after administration of compound. On both occasions, at the time of examination by veterinarians, ataxia and seizure activity appeared to be minimal and it was determined to allow the study to continue.

Explanation of Animal Totals- 2004

Column E. APHIS Form 7023
Registration Number 33-R-0025/584

Species common name	Number of animals	Explanation
Dogs	6	5 dogs-Studies involved in pre-clinical drug safety studies mandated by 21 CFR 312.23(a)(8)(ii) and 21 CFR 314.50(d)(2) to determine safety of new pharmaceuticals prior to human trials and eventual approval for human use. FDA requires study design to establish the maximum tolerated dose. This results in demonstrated toxicity and occasional distress, especially in the high-dose groups. Use of anesthetic, analgesic or tranquilizer drugs was contraindicated to avoid drug interaction or masking toxicity. 1 dog- Unexpected complication with compound on pk studies where animals experienced seizures and subsequent death before diazepam and/or phenobarbital could be administered.
Rabbits	24	All rabbits were used in polyclonal antibody production using Complete Freund's Adjuvant followed by Incomplete Freund's adjuvant. Skin lesions were noted on skin at sites of "complete" inoculations and no pain medication had been administered. Steps have been taken to allow for better visibility of potential lesions, minimize the incidence of lesions and analgesics used as needed in the future.
Non-human primates	1	The femoral artery was inadvertently accessed for a venous blood withdrawal and formed a large hematoma. It was thought to be controlled, but the animal was later found in lateral recumbency with a low packed cell volume and low blood pressure. Supportive therapy was given and the monkey recovered.
Ferrets	17	-Three ferrets were inadvertently dosed into the trachea rather than into the stomach with dosing compound. -Two ferrets died due to study related causes. These animals are used in discovery research to determine the potential for compounds to promote emesis. This work directly supports the development of new drugs for human use. Unexpected reactions of compound and/or vehicle may occur and on these occasions, veterinary support was always on hand. At each occurrence, the animals were examined and deemed to be stable prior to placement in their cages. Fluids (SQ) and supportive care had been administered. -Twelve ferrets (six on two separate occasions) exhibited signs of ataxia and seizure activity after administration of compound. On both occasions, at the time of examination by veterinarians, ataxia and seizure activity appeared to be minimal and it was determined to allow the study to continue (pk blood samples and observation for emesis) without administration of valium since the ferrets did not appear to be distressed and were coming out of the seizure activity. Prior to veterinary examination, no seizure lasted longer than 15 seconds duration. All ferrets recovered without incident.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 33-R-0090
2. Number 280 of animals used in this study.
3. Species (common name) RABBIT of animals used in the study.
4. Explain the procedure producing pain and/or distress.

ACUTE DERMAL TOXICITY STUDIES MAY RESULT IN LOCAL DERMAL IRRITATION AFTER TEST ARTICLE IS EXPOSED TO THE SKIN. THE ENDPOINT OF THE STUDY IS SURVIVAL AT 14 DAYS AFTER EXPOSURE.

DERMAL IRRITATION STUDIES CAN RESULT IN LIMITED SKIN IRRITATION IN VISION FURT. IRRITATION RECOVERY DOES NOT EXCEED 14 DAYS. IN MOST CASES THE STUDY ENDS A 72 HOURS AFTER EXPOSURE.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

THE US EPA (FIFRA) REQUESTS SURVIVAL DATA FOR SELECTED ANTI-MICROBIAL COMPOUNDS. WE UTILIZE A LIMIT TEST TO ASSESS NORMAL HEALTH EFFECTS AND DETERMINE BY BRACKET WHETHER THE COMPOUND IS ASSIGNED TO TOXICITY CATEGORY I, II, III, IV.

PROVISION IS ALWAYS MADE FOR THE ANIMALS' COMFORT AND WELL BEING DURING THE STUDY INTERVAL.
6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

Agency EPA FIFRA CFR 16 CFR 1500 40 CFR 160

Champaign, IL 61821

Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 33-R-0097

2. Number 13 of animals used in this study.

3. Species (common name) Black Bears of animals used in the study.

4. Explain the procedure producing pain and/or distress.

Animals are used to study hibernation which involves fasting during the months. In the wild, during the natural denning season, black bears normally do not have access to food or even water, but are able to survive as long as 5 to 7 months under these conditions without eating, drinking, urinating or defecating. In addition, female bears are able to give birth and nurse cubs while maintaining their winter fast. In order to stimulate the metabolic changes in captive black bears, it is necessary to reproduce the denning state as found in the wild. To do this, bears housed at the Carle Foundation Research Facility are fasted for 4-5 months, but have free access to water. The bears are observed daily by the caretaker and once a month by a veterinarian. Anesthesia and medications for pain relief are used for any painful procedures.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Not applicable

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

Agency Not applicable CFR

SEP 27 2004

This report is required by law (7 USC 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 211.

Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 33-R-0113

2. Number 44 of animals used in this study.

3. Species (common name) chinchillas of animals used in the study.

4. Explain the procedure producing pain and/or distress.

Each animal will receive 5 injections of D-methionine or placebo. D-methionine is a naturally occurring amino acid and will cause no distress to the animal other than the pain of injections. The animals will also be exposed to 105dB SPL noise for 6 hours. Noise of this level is equivalent to a helicopter or snow mobile. The animals will have access to water during this time.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see item 6 below)

This protocol is testing the ability of D-methionine as an antioxidant to prevent permanent noise-induced hearing loss. Therefore both noise exposure and D-methionine injections are essential. The noise exposure may cause distress but it appears to be minor as animals appear behaviorally to adapt quickly to this noise environment.

We have previously documented that noise alters cochlear oxidative state. Sedative drugs could alter the oxidative state and make our data uninterpretable. Also humans do not use sedation during their noise exposures so animal data with sedation would not appropriately model the human condition. The other problem is that we have no way of monitoring anesthesia/sedation level during the noise exposure which could be risky.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

Agency None CFR

OCT 2 2 2004

This report is required by law (7 USC 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 21:

See attached form for additional information.

Number of animal being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals an for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for wh the use of appropriate anesthetic, analgesic, or tranquiliz drugs would have adversely affected the procedures, res or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reaso such drugs were not used must be attached to this report	F. TOTAL NUMBER OF ANIMALS (COLUMNS C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs	5	14			14
7. Hamsters					
8. Rabbits					
9. Non-human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
